

## **Brant M. Niven**

Lockport, IL • 815-641-2284 • NivenBrant@gmail.com

**Data Analyst | Business Intelligence | Revenue & Marketing**

---

### **Professional Summary**

Data Analyst with experience modernizing reporting and analytics across multiple business functions. Detail-oriented and adaptable, delivering scalable dashboards, standardized metrics, and actionable insights. Proven in integrating AI-assisted workflows and data transformation frameworks to convert unstructured data into structured, reusable models, improving efficiency, repeatability, and decision-making across reporting pipelines.

---

### **Professional Experience**

#### **Data Analyst (Revenue & Marketing)**

#### **Planned Property Management (PPM) — Chicago, IL**

*May 2025 – Present*

- Built and maintained analytics frameworks supporting a \$1.2B real estate portfolio and \$100M+ in annual revenue, integrating operational, financial, and marketing data to drive scalable reporting and executive decision-making
- Built and modernized a company-wide analytics ecosystem across 30+ properties, integrating leasing funnel performance, occupancy and vacancy, tenant demographics, competitor benchmarking, parking data, marketing expenditures, and financial reporting
- Developed and automated property-level and sub-market dashboards in Looker Studio and Power BI, including occupancy and vacancy tracking, demographic insights, marketing expenses and ROI analysis, P&L reporting, and lease renewal analysis
- Designed the LTA Explorer (Leads → Tours → Applications) dashboard to analyze multi-year conversion trends, funnel drop-offs, and performance differences by property and neighborhood, while integrating marketing expenses at the individual source level (ILS, brokers, SEO, referrals) to calculate true cost per lead, cost per tour, and cost per application, improving budget visibility and ROI tracking
- Rebuilt and fully automated a legacy vacancy forecasting process maintained manually for nearly 20 years, delivering 4-month forward vacancy projections using move-outs, renewals, and incoming application pipeline activity, increasing reporting accuracy and reducing report turnaround time by an average of 45%

- Designed scalable Excel- and SQL-ready data models and standardized reporting definitions, cleaning and unifying multi-year tour logs, amenity, and tenant datasets to quantify lost sales drivers, benchmark competitors, strengthen renewal strategy, and support pricing and positioning decisions while enabling reliable self-service insights for leadership
- 

## **Intern Analyst**

**JK Development** — Lombard, IL

*April 2024 – August 2024*

- Supported analysis of annual rental property performance across revenue and expense categories
  - Performed variance analysis on operating expenses and summarized insights for management
  - Maintained and organized datasets used in operational and financial reporting
  - Cleaned, validated, and prepared data for management-level analysis and presentations
  - Assisted in streamlining reporting workflows by improving data organization and standardizing recurring metrics, reducing errors and improving monthly and annual reporting efficiency
- 

## **Head of Preparation**

**Darlene's** — Food Service

*September 2021 – January 2025*

- Worked effectively in fast-paced environments with competing short-term and long-term priorities
  - Prepared 400–500 lbs of raw product daily for full kitchen utilization
  - Developed and implemented new processes within an existing structure, improving efficiency by up to 45%
  - Prioritized tasks based on urgency and operational impact
  - Managed and coordinated staff across multiple roles to ensure timely task completion
  - Cultivated strong working relationships across a diverse, multicultural workforce
-

## Additional Information

- Strong communicator skilled in translating complex datasets and technical findings into clear, understandable, and actionable insights for technical and executive audiences
  - End-to-end analytics expertise, from raw data ingestion and transformation through dashboards and reporting
  - Strong problem-solving ability with a data-driven mindset and attention to detail
  - Effective relationship builder with cross-functional teams and stakeholders
  - Experience supporting consumer insights, branding initiatives, and strategic decision-making
  - Self-motivated with a keen sense of personal responsibility
- 

## Technical Skills

- **Analytics & BI:** Excel (Advanced), Looker Studio, Power BI, Tableau
  - **Data & Programming:** SQL, Python, data modeling, data cleaning, normalization
  - **Reporting & Analysis:** Funnel analysis, vacancy forecasting, demographic analysis, marketing ROI
  - **Tools:** Rent Manager, HelloData, R, Excel-based automation frameworks
- 

## Education

### Bachelor of Science — Business Analytics

Lewis University — Romeoville, IL | *May 2025*

NSLS Member

### Bachelor of Science — Marketing (Minor)

Lewis University — Romeoville, IL | *May 2025*

## Capstone Project

- Analyzed over 800,000 transactions across 38 countries and 3,768 products
- Built interactive dashboards using Python, Tableau, Power BI, and Excel
- Applied machine-learning models to forecast demand and support inventory optimization
- Delivered strategic recommendations focused on customer segmentation and international expansion
